Gloria.

I: A bold start, but not always together, and more dynamic contrast into [D]. Some intonation issues throughout the band before [E]. The two sides of the band slightly drift at [E], although the playing is secure. Exciting close.

II: I feel 'pp' could be quieter. Well done soloists. Perhaps even more effect could have been made with a wider \equiv antiphonal choir's. Before [K] triplets seem 1.1.1 rather than iii. Some ensemble issues and nervous sounds. Well done band & MD considering the Audience phone !!!

III: Not all detail is heard in lower band, but pace & feel is good. Good TECH at [P]. Rhythmically this doesn't always work, but the band commits.

IV: Band seems heavy handed. Well done soloist! Great projection. Accompaniment needs to be more in keeping with soloist & allow more subtlety. Really well done soloist.

V: Not together in the \mathcal{P} to start, but this picks up. Some slightly untimely playing at [X] and some hair issues @ [Y]. Some balance issues at the andante & perc not always with band. More contrast on p < >. I lose detail in the FFF. Good horns & lower band after 309.

Some good playing, but felt too 'safe' at times
